I.Dekk® and I.Dekk® HD, with Traction Finish, offers more than just beauty. Its patented formulation is, in part, what makes it a step above the competition. The patented DuxxBak Composite, with a combination of Biodac®, rice hulls and high-density polyethylene resin, has a high fade resistance and very minimal water absorption in comparison to its WPC competitors. Its strong I-Beam construction provides industry leading strength in a lightweight profile. I.Dekk® and I.Dekk® HD will NOT rot or mold and will remain looking like new for the life of your deck.

The DuxxBak Composite used in the I.Dekk® family of products, contains no wood fillers unlike many other alternative decking products. Over 50% of the materials used in the DuxxBak Composite are either rapidly renewable resources or reclaimed material that would normally be landfilled. The DuxxBak composite formulation is why I.Dekk® and I.Dekk® HD are the solution to creating a dream outdoor living space.
