OPTIMA Dekk LT brings the beauty and functionality of ArmorCap science in a new era of manufactured decking. The DuxxBak composite was created to overcome the issues presented with wood- and PVC-based composite decking materials by defying all the elements that have proven to be the enemy of traditional outdoor products.

Manufactured using all American, rapidly renewable materials, OPTIMA Dekk LT will not rot, as it contains no wood filler to break down with environmental exposure. And because of its patented blend of BioDac®, rice hulls, and virgin High Density Polyethylene, OPTIMA Dekk LT is naturally-resistant

to the effects of mold and mildew. We're so sure of our product, we're shipping it with a limited lifetime warranty.

If it's a beautiful deck that you're building, you will not find a more dimensionally-realistic wood grain than that which we've designed for our OPTIMA Dekk LT product line. Available in three convincing representations of traditional hardwoods, your guests will be hard-pressed to guess whether your deck is made of wood or manufactured decking.

Make your next deck your last deck with DuxxBak Composite Decking!
