CEDAR

BLACK  
WALNUT

SEDONA  
RED

DARK  
MAHOGANY

OPTIMA® Dekk brings the beauty and functionality of ArmorCap science in a new era of manufactured decking. The DuxxBak composite was created to overcome the issues presented with wood- and PVC-based composite decking materials by defying all the elements that have proven to be the enemy of traditional outdoor products.

Manufactured using all-American, rapidly renewable materials, OPTIMA® Dekk will not rot, as it contains no wood filler to break down with environmental exposure. And because of its patented blend of BioDac®, rice hulls, and virgin High Density Polyethylene, OPTIMA® Dekk is naturally-resistant

to the effects of mold and mildew. We're so sure of our product, we're shipping it with a lifetime limited warranty.

If it's a beautiful deck that you're building, you will not find a more dimensionally-realistic wood grain than that which we've designed for our OPTIMA® Dekk product line. Available in four convincing representations of traditional hardwoods, your guests will be hard-pressed to guess whether your deck is made of wood or manufactured decking.

Make your next deck your last deck with DuxxBak Composite Decking!
